

# Guttman Energy Fuelman Fleet Card: Cost-Plus Pricing

*Zero Fees, No Contracts*

Guttman Energy Fuelman Fleet card cost-plus pricing provides savings on diesel fuel. Pricing is based on the wholesale cost of fuel at the closest petroleum terminal, freight to the station, federal and state taxes, and a set markup which covers the commission paid to station owners and all costs incurred by the card company.

Profit margins for diesel fuel at a truck stop or service station can range from 15 cents to 50 cents per gallon. The spread between the wholesale cost of diesel fuel and the station's posted price provide substantial savings.

# Guttman Energy Fuelman Fleet Card

*Zero Fees, No Contracts*

At Guttman Energy we offer a unique fleet card solution with access to 65,000 fueling stations nationwide, while our experienced account professionals have the flexibility to craft a fleet fueling solution to meet your individual needs.
